Punctuality and quality in finding the suitable solution are significant aspects of our operative philosophy which aims to satisfy customer needs.

Feasibility studies, prototypes realisation, manufacturing and final testing.

In-house development of cutting edge equipment for all aspects of the technical surveillance industry.

Modification of existing products to suit specific user requirements.

World wide distribution network and attentive After-Sales Service.

Training courses on BEA's products, deployment techniques and security awareness.

Full technical support by specialist operators.

For almost 20 years BEA has been supplying European Governments and Public Authorities with cutting edge technical products and services.

Our products are characterised by:

- reliability
- latest technologies
- minimal footprint
- very low power consumption
- high performance
- high degree of customisation

In a context of high innovation, BEA has undertaken collaborations with various companies. They have been selected to cover a specialist role of excellence in their respective market niches.

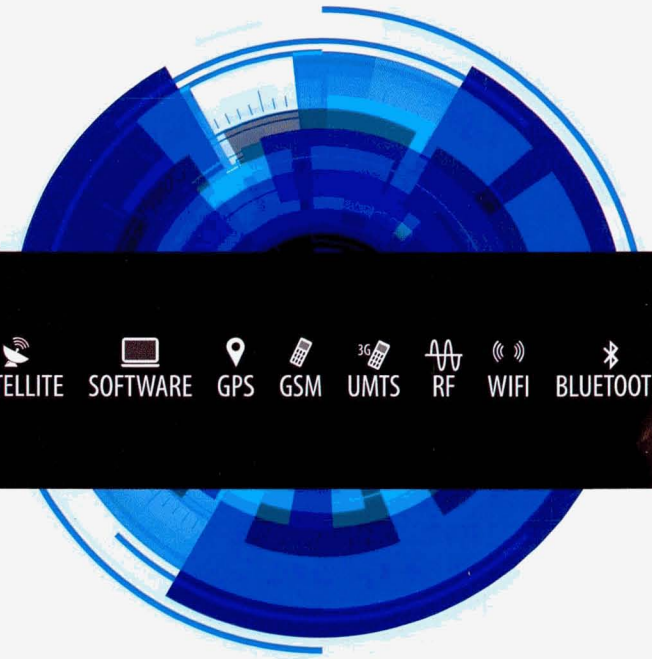

Our Mission is to design, manufacture and supply exclusive highly personalised latest generation technological products and services to its customers all of them belonging to Governments, Public Authorities and Police Forces.

Our Vision is to be a trustworthy and competent technological partner capable of responding to increasingly specific global demand for security.

CORE BUSINESS

- Complete systems for audio surveillance in fixed installations or mobile targets
- Covert digital recorders
- Analysis, filtering and enhancement tools for audio signals
- Miniaturised tracking systems with or without GPS support
- Applications for the management of GIS & tracking devices
- Mobile phone activity monitoring and jamming
- Real-time video surveillance over 3G network
- Multimedia audio and data recording systems
